### Example Set Up for 3 Players

Game Board

Tiles

## Set Up

- 1 Place the game board in the center of the play area.
- 2 Each player chooses a color and takes all the tiles of that color.
- 3 Starting with the youngest player, each player chooses a spinner and a Goal card. For your first game, place your Goal card in front of you with the purple side up.
- 4 If you're playing with fewer than four players, place the remaining spinners next to the game board, as if in front of pretend players. Leave the remaining tiles and Goal cards in the box.

goes first!**

## Object

Be the first player  
with four of your tiles  
showing on the game  
board that match  
your Goal card.

## On Your Turn, Spin Your Spinner:

- ★ **If you spin a picture (character, color, shape, or pattern),** play one of your tiles on a matching space on the game board. If there are no matching spaces, you may play on any empty space. You cannot play on a space that already has a tile.
- ★ **If you spin WILD!**, play one of your tiles on **ANY** space on the game board. You can even play on top of another tile if your tile will fit – only four tiles may stack on each space.
- ★ **If you spin SWAP!**, everyone passes their spinner to the left. If you're playing with fewer than four players, don't forget to pass the pretend players' spinner. **Then spin again!**

**Now it's the next player's turn!**

## End of Game

The first player with four of their tiles showing on the game board that match their Goal card is the winner!

### Goal Cards

You can match the squares on your Goal card to your tiles anywhere on the game board, even if they're facing a different direction.

Each Goal card has a Basic purple side and an Advanced pink side. When you set up the game, choose which side to use. You may want to choose a different side for each player, such as younger players using purple sides and older players using pink sides.
