TIPS AND STRATEGIES FOR MASKED MANAGER AND JUN-HO!

- At the start of the game, choose whether you will be playing as Masked Manager or Jun-ho. Each brings their own unique strengths to the game!
- Masked Manager can be a powerful ranged attacker if moved into position by other characters' abilities or placed in a central area, where he doesn't have to move often.
- Use Masked Manager's Order Prisoners ability followed by Rapid Shot for a devastating combo attack!
- Use your other characters to position Jun-ho so that he can challenge rivals and interact with point markers easily. This will set him up so he can use Send Data to gain additional points.
- Pair Jun-ho with characters that can help him move into an advantageous position, or can help keep his Evidence tokens on the cooldown track.
